

# FROZEN RAILS 2014

11 – 12 September 2014

Helsinki, Finland

Frozen Rails is Finland's oldest Ruby conference, as well as one of Europe's top Ruby conferences.

For the fourth time, Frozen Rails will see top speakers from around the world arrive in Helsinki to speak to a diverse audience of top notch web developers from Finland and abroad.

## Learn new things

Going to Frozen Rails presents an opportunity for your developers to learn new techniques and approaches that you might never have the time or opportunity to learn about otherwise.

There are talks to suit developers of every skill level, regardless of whether they are highly experienced or just starting to code.

## Single track

Frozen Rails is a single track, two day event. This gives your developers the chance to absorb everything that our speakers have to say. No need to make difficult choices between which track to attend. If multiple talks are relevant to you, you get to see them all!

## The future of web development

Frozen Rails has a wide range of talks. Subjects range from topics which are relevant today to topics which might well be essential a year or two from now.

## Networking

Frozen Rails gets over two hundred participants from all over the world. About half of our attendees are Finnish and the other half are visiting from abroad.

We have generous breaks during the event, so this gives your developers plenty of time to talk to our speakers and other attendees.

## For developers, by developers

Frozen Rails is organised by Kisko Labs. Kisko Labs is Finland's leading Ruby consultancy and has been intimately involved in Finland's Ruby community as long as there has been one. Since 2007, we've worked with companies big and small to bring their business concepts to the web.

## A great location

The Frozen Rails venue is right in the centre of Helsinki, convenient for almost every form of public transportation in Helsinki (buses, trams, and the metro). There are several hotels within walking distance of the venue.
